## EDUCATION

### SUNGKYUNKWAN UNIVERSITY

B.S. Computer Science

Major in Software Engineering

Relevant Coursework: Data Structure, Capstone Design Project, Computer Programming for Engineers

Suwon, South Korea

Expected 2028

## EXPERIENCE

### Human Language Intelligence Laboratory

Natural Language Processing Research Intern

Suwon, South Korea

Jun 2025 – Current

- Implemented text-infilling pipelines for masked language modeling and entity detection tools to detect cultural biases in prompt generation of GPT models to support research on generative NLP models.
- Improved cultural representation in language models by integrating diverse datasets, achieving near-perfect accuracy on benchmark cultural test sets.
- Designed a novel evaluation metric (CBS score) to measure model performance, and conducted experiments on bias detection and mitigation in Large Language Models (LLMs).

### Đép's CKB services

Founder

Hanoi, Vietnam

Sep 2020 – Jan 2024

- Service provider in modifying custom keyboards, including lubing components, custom keyboard parts configuration advisor, warranty, customer support, and aftercare services.
- Advertised our workshop on different platforms and did collaborations, which dramatically improved our reputation from a small user group within the high school to a large community comprising over 100k members across the nation within 2 months. Our collaborations drastically enhanced our revenue by roughly 250% after 2 months of networking.
- Managed the workshop funds and resources in which allowed the business to sustain and thrive through the pandemic, gained the trust of 30+ loyal service users, contributing over 20k USD to the business

## UNIVERSITY PROJECTS

### Capstone Design Project

Lab Access System for Lab Reservation System

Sep 2024 – Dec 2024

- Contributed to building an AI face recognition function for a lab reservation system by researching the efficiency and compatibility of OpenCV and TensorFlow libraries with our current hardware system
- Responsible for hardware management through the contribution to project hardware selection, balancing between our budget and functionality, and designing and modifying 3D components, models, and printing for our project
- Contributed to product testing and resolving software and hardware conflicts for our project, maintaining the full working efficiency of the final product

## SKILLS

### HARD SKILLS

- Programming Languages: Python, C
- Web Technologies: HTML, CSS
- Tools & Systems: Git, GitHub, Docker, Linux

Skillful  
Proficient  
Proficient

### SOFT SKILLS

- Problem-solving
- Communication
- Agile methodologies
- Presentation
- Interpersonal Communication

## LANGUAGES

---

**Vietnamese:** Native Speaker

**English:** Full Professional Proficiency

**Korean:** Elementary Proficiency

## HOBBIES

---

- **Activities:** Playing badminton, reading books about psychology and science fiction, and exploring new technologies
- **Hardware-related hobbies:** Custom mechanical keyboards, custom audio devices
