EDUCATION

SUNGKYUNKWAN UNIVERSITY — Suwon, South Korea
B.S. Computer Science and Engineering — Expected 2028
Major in Computer Science and Engineering
Research Interests: Large Language Models, Natural Language Processing, Vision-Language Models

NANYANG TECHNOLOGICAL UNIVERSITY — Singapore, Singapore
Exchange Student, Computer Science — Aug 2026 – Dec 2026
Coursework: Natural Language Processing, Human-Computer Interaction, Engineering Communication, Computer Communication, Communication Principles, Embedded Programming, Computer Graphics and Visualization.

EXPERIENCE

Human Language Intelligence Laboratory (SKKU) — Suwon, South Korea
Natural Language Processing Research Intern — Jun 2025 – Sep 2025

- Implemented text-infilling pipelines using PyTorch and Hugging Face Transformers for masked language modeling to support research on generative NLP models (BERT Language models) on the Vietnamese language.
- Handled data preprocessing and participated in fine-tuning BERT models, contributing to experiments focused on cultural knowledge evaluation.
- Implemented a novel evaluation metric, such as the Cultural Bias Score (CBS score) to measure model performance, and conducted experiments on bias detection and mitigation in Large Language Models (LLMs).
- Conducted data quality assurance on a multi-dimensional Vietnamese dataset encompassing 10 distinct cultural categories, mitigating noisy data for the research pipeline.

Đép's CKB services — Hanoi, Vietnam
Founder — Sep 2020 – Jan 2024

- Service provider in modifying custom keyboards, including lubing components, custom keyboard parts configuration advisor, warranty, customer support, and aftercare services.
- Advertised our workshop on different platforms and did collaborations, which dramatically improved our reputation from a small user group within the high school to a large community comprising over 100k members across the nation within 2 months. Our collaborations drastically enhanced our revenue by roughly 250% after 2 months of networking.
- Managed the workshop funds and resources in which allowed the business to sustain and thrive through the pandemic, gained the trust of 30+ loyal service users, contributing over 20k USD to the business

UNIVERSITY PROJECTS

Capstone Design Project — Sep 2024 – Dec 2024
Lab Access System for Lab Reservation System

- Contributed to building an AI face recognition function for a lab reservation system by researching the efficiency and compatibility of OpenCV and TensorFlow libraries with our current hardware system
- Responsible for hardware management through contributions to project hardware selection, balancing our budget and functionality, and designing and modifying 3D components, models, and printing for our project
- Contributed to product testing and resolving software and hardware conflicts for our project, maintaining the full working efficiency of the final product

SKILLS

Programming Languages: Python, C
Web Technologies: HTML, CSS
Tools & Systems: Git, GitHub, Docker, Linux
AI/ML Frameworks & Libraries: PyTorch, Hugging Face Transformers, TensorFlow, OpenCV
Data Science Libraries: Pandas, NumPy

SCHOLARSHIPS

Academic Exellence Scholarship 2025
Global Challenge Scholarship Aug 2026

- Selected as one of the top 50 applicants who went for an exchange semester at a foreign institution.

LANGUAGES

Vietnamese: Native Speaker
English: Full Professional Proficiency
Korean: Elementary Proficiency
